Company Description

DAMBACH Lagersysteme (DAMBACH) is a leading manufacturer of automatic storage and retrieval machines for high racking installations up to 50 meters. Unit conveyors and shuttle storage solutions for multi-deep storage round off the product offering. The scope of service comprises related and integrated load handling devices and controls, both based on the company's own research and development. DAMBACH also offers a large variety of services to refurbish and upgrade existing installations. The company is partner to system suppliers and operates worldwide. With more than 40 years of expertise in intralogistics, DAMBACH is the partner of choice for challenging projects. For more information on DAMBACH please visit www.dambach-lagersysteme.com

Job Description

DAMBACH has an immediate opening for two Control Engineers. This position provides commissioning of stacker cranes and conveyors, standby support during Start of Production as well as customer controls training for installed DAMBACH equipment. Primary objective is to ensure a smooth and fast commissioning phase and to ensure that Customers are satisfied with their DAMBACH equipment.

Qualifications:

- Two years (minimum) experience in PLC programming (structured text and ladder), familiarity with Siemens and Allen Bradley PLC hardware/software is required.
- Set up and commissioning of drive systems, familiarity with SEW Movidrive is required
- Experience with SRM or AS/RS or conveyors controls is desired and highly prized.
- Experience with Visual Basic and Object-Oriented programming is a plus.
- Must be willing to travel up to 70% of the working time.
- Must be able to write concise, clear and complete work reports.

- Must have knowledge in the use of personal computers and Microsoft Office software.
- Additional specialized skills and knowledge needed for this position will be provided through a special DAMBACH training program.

Job Family Responsibilities:

- Performs standard commissioning tasks from A-Z. Usually program code is provided and must only be modified to specific project requirements.
- Refers complex, unusual problems to others. The Controls Engineer is supported by intra-organizational experts.
- Performs controls training for customers.
- Maintains documents of all works performed.

Education:

Bachelor of Science in Electrical Engineering or two-year Associates Degree in a Electro- Technician program is preferred.

Compensation:

DAMBACH provides a competitive salary as well as a comprehensive benefits package to its employees comprised of Medical, Dental, Long Term Disability, 401(k) and paid holidays.

General

We are an Equal Opportunity Employer and do not discriminate against any employee or applicant for employment because of race, color, sex, age, national origin, religion, sexual orientation, gender identity, status as a veteran, and basis of disability or any other federal, state or local protected class.
